# ProImmune

TheBestImmuneSupport.com

## Recommended Dosage Instructions

**Adults:** Take 2 scoops daily, AM & PM, to help your cells naturally replenish glutathione and support optimal cellular health.* Adults over 70, or those recovering from illness or surgery, may benefit from additional scoops; ask your healthcare provider what amount is right for you. ProImmune provides natural amino acids, so the body uses what it needs to make glutathione, and extra amino acids are simply used by the body for energy.

**Children (ages 6–12):** Take 1 scoop daily. ProImmune is recommended by pediatricians, including Bambini Pediatrics, the largest pediatric practice in New York's Hudson Valley.

**During Times of Extra Demand:** When your body is under extra stress, such as during the cold and flu season, travel, or recovery, Dr. Edward (Ted) Fogarty, MD, suggests 1 scoop every three hours for 3–4 days to help replenish cellular glutathione.* Stay well hydrated, as water supports the body's natural detoxification. Research on ProImmune at the Georgia State University virology lab, conducted under an $88M NIH research grant, shows that cells kept glutathione-rich with all-natural ProImmune are better able to withstand oxidative stress.*

**How to Take:** Place a scoop directly on the tongue and allow it to dissolve. If you prefer, ProImmune may also be added to a smoothie, beverage or yogurt. ProImmune is heat-stable, so one scoop can also be baked into each muffin, waffle, pancake or cookie.

**Benefits:** Regular use of ProImmune supports energy, sleep quality, skin health and cellular detoxification.* Its patented formula provides three safe, all-natural amino acid precursors that cells use to make their own glutathione inside the cell, supporting intracellular detoxification and helping reduce oxidative stress.* Unlike synthetic glutathione or NAC, ProImmune is designed to work with the body's own natural process. ProImmune was developed from $88 million in NIH-funded research involving 18 universities, and is designed around principles of nature refined over 3.5 billion years of evolution.

**Safety and Usage Notes:**

- As with any new supplement, it is always suggested to show your jar and the science on our website, TheBestImmuneSupport.com, to your healthcare provider so they can better understand the effectiveness of this scientific discovery, and ask their opinion.
- **Individuals undergoing chemotherapy, or who have had a kidney transplant, should consult their oncologist or healthcare provider about whether replenishing intracellular glutathione to the optimal range is safe during their treatment.**
- Pregnant or nursing mothers: ProImmune's three amino acids are the same ones already found naturally in your cells and in everyday foods. As with any new supplement, show your jar and the science at TheBestImmuneSupport.com to your healthcare provider and ask their opinion.
- ProImmune is all natural, with no side effects reported in more than 15 years of use. Store in a cool, dry place.

**Product Information:** Each jar contains 3.5 oz (100 grams), approximately 50–60 scoops. Powder settles during shipping, so a jar may appear half full even though it contains the full 100 grams. If you are unsatisfied for any reason, contact Joseph V. Cassarino at **info@TheBestImmuneSupport.com** with your receipt for a full refund.

ProImmune has been recommended by leading pharmacists, medical centers and health food markets across the U.S. since 2008. For peer-reviewed research and additional information, please visit **TheBestImmuneSupport.com** and follow us on Instagram: **Best Immune Support**.
